Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 recites the limitation "said first and second frames" in lines 14-15. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nonaka et al. (5,993,373).

Regarding claim 22, 373 teaches a medical particle irradiation apparatus comprising a rotating gantry (40) including an irradiation unit emitting particle beams, a first ring member (72) located within and supported by said rotating gantry such that it can rotate relative to said rotating gantry, a second ring member (62) fixedly located opposite said first ring member, and a flexible moving floor (82) located between said first and second ring members, said flexible

Art Unit: 2881

moving floor being engaged with said first and second ring members in such a manner as to move freely such that its bottom is substantially level and that it moves as said rotating gantry rotates (col. 4, line 16 - col. 5, line 17 and Fig. 2). They also teach that regardless of how much the rotation gantry (40) rotates, the absolute position of moving ring member (72), or its position relative to the fixing ring member (62) is kept constant, and thus the moving floor passage (80) is also kept at the same position (col. 5, lines 12-17). This teaching, in addition to the teaching a conveyor chain fitted to the ring member (72), obviously teaches on the claimed use of an anti-coronation unit. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to prevent undesired rotation to ensure proper alignment of the rotating gantry with the ring members and the floor.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
